

AMENDMENTS TO THE CLAIMS

1. (Previously Amended): A cosmetic, skincare or make-up composition comprising fibers and at least one active agent for treating greasy skin, wherein the at least one active agent is selected from the group consisting of β -lactam derivatives; quinolone derivatives; ciprofloxacin; norfloxacin; tetracycline and its salts; erythromycin and its salts; amikacin and its salts; 2,4,4'-trichloro-2'-hydroxydiphenyl ether; 3,4,4'-trichlorocarbanilide; phenoxypropanol; phenoxyisopropanol; doxycycline and its salts; capreomycin and its salts; chlortetracycline and its salts; oxytetracycline and its salts; clindamycin and its salts; ethambutol and its salts; hexamidine isethionate; metronidazole and its salts; pentamidine and its salts; gentamicin and its salts; kanamycin and its salts; lineomycin and its salts; methacycline and its salts; methenamine and its salts; minocycline and its salts; neomycin and its salts; netilmicin and its salts; paromomycin and its salts; streptomycin and its salts; tobramycin and its salts; miconazole and its salts; amantadine salts; para-chloro-meta-xyleneol; nystatin; tolnaftate; 3-hydroxybenzoic acid and its salts; 4-hydroxybenzoic acid and its salts; 2-hydroxybutanoic acid and its salts; 2-hydroxypentanoic acid and its salts; 2-hydroxyhexanoic acid and its salts; phytic acid and its salts; N-acetyl-L-cysteine acid and its salts; lipoic acid and its salts; azelaic acid and its salts; arachidonic acid and its salts; ibuprofen; naproxen; hydrocortisone; acetaminophen; resorcinol; octopirox; lidocaine hydrochloride; clotrimazole; 10-hydroxy-2-decanoic acid and its salts; zinc gluconate; plant extracts from the ericacea family; sulphur-rich plant extracts; and mixtures thereof.

2. (Canceled).

3. (Original): The composition according to Claim 1, wherein the amount of the at least one active agent ranges from 0.0001% to 30% by weight relative to the total weight of the composition.

4. (Original): The composition according to Claim 1, wherein each of the fibers has a length in a range from 1 μm to 10 mm.

5. (Original): The composition according to Claim 1, wherein each of the fibers has a cross section that fits within a circle having a diameter in a range from 1 nm to 100 μm .

6. (Original): The composition according to Claim 1, wherein each of the fibers has a length L; a cross section that fits within a circle of diameter D; and a shape factor, given by L/D , that ranges from 5 to 150.

7. (Original): The composition according to Claim 1, wherein the fibers are selected from the group consisting of silk, cotton, wool or flax fibers; cellulose fibers extracted from wood, plants or algae; polyamide fibers; modified cellulose fibers; poly-phenyleneterephthalamide fibers; acrylic, polyolefin, glass, silica, aramid, carbon or TEFLON® fibers; insoluble collagen fibers; polyester, polyvinyl chloride, polyvinylidene chloride, polyvinyl alcohol, polyacrylonitrile, chitosan, polyurethane or polyethylene phthalate fibers; fibers formed from a mixture of polymers; resorbable synthetic fibers; and mixtures thereof.

8. (Original): The composition according to Claim 1, wherein the fibers are selected from the group consisting of polyamide fibers, poly-p-phenyleneterephthalamide fibers, cotton fibers, and mixtures thereof.

9. (Original): The composition according to Claim 1, wherein the fibers are present in an amount ranging from 0.1% to 30% by weight relative to the total weight of the composition.

10. (Original): The composition according to Claim 1, wherein the fibers have a yarn count ranging from 0.15 to 30 denier.

11. (Original): The composition according to Claim 1, wherein the fibers are coated fibers.

12. (Original): The composition according to Claim 1, wherein the composition is an emulsion.

13. (Original): The composition according to Claim 1, wherein the composition has a covering index of greater than 0.1.

14. (Previously Amended): The composition according to Claim 1, wherein the composition is in a physiologically acceptable medium.

15. (Original): The composition according to Claim 1, wherein the composition is in the form of a cast product.

16. (Original): A method of making a cosmetic, skincare or make-up composition, the method comprising

mixing fibers and at least one active agent for treating greasy skin; and

forming the composition of Claim 1.

17. (Original): A method of using a cosmetic, skincare or make-up composition, the method comprising applying the composition of Claim 1 to skin.

18. (Original): A method of using a cosmetic, skincare or make-up composition, the method comprising

applying the composition of Claim 1 to skin; and

making the complexion of the skin at least one of matte, smooth and uniform, or fading out skin relief defects in the skin.

19. (Original): A method of using a cosmetic, skincare or make-up composition, the method comprising

applying the composition of Claim 10 to skin; and

making the complexion of the skin at least one of matte, smooth and uniform, or fading out skin relief defects in the skin.

20. (Original): A method of using a cosmetic, skincare or make-up composition, the method comprising

applying the composition of Claim 14 to skin; and

making the complexion of the skin at least one of matte, smooth and uniform, or fading out skin relief defects in the skin.

21-34. (Canceled):

35. (Previously Presented): The composition of Claim 13, wherein the covering index of the composition ranges from 0.1 to 0.5.

36. (Previously Presented): The composition of Claim 13, wherein the covering index of the composition ranges from 0.13 to 0.4.

37-42. (Canceled):

43. (Previously Presented): A method of fading out skin relief defects in skin comprising applying to the composition of Claim 1 to the skin.

44. (Previously Presented): The method of Claim 43, wherein the composition has a covering index ranging from 0.1 to 0.5.

45. (Previously Presented): The method of Claim 43, wherein the composition has a covering index ranging from 0.13 to 0.4.

46. (Previously Presented): A method for treating greasy skin, comprising applying the composition of claim 1 to greasy skin in an amount sufficient to provide a matte effect.

47. (Previously Presented): A method for controlling the greasy appearance of skin, comprising applying the composition of claim 1 to skin in need thereof.
